Product Description

A powerful, specially formulated, microbial cleaning solution ideal for removing and remediating fats, oils, grease, protein, cellulose, starch as well as assisting with cleaning grease traps and septic tanks. Mr. Eats-It Fats Oils Grease Feces and Urine (FOGFU) is the perfect choice for restaurants or food producing facilities where drain lines and grease traps are a problem. It is also effective for cleaning greasy floors and controlling odors as well as cleaning blood, vomit, mold, animal and human waste.

This proven powerful formulation also is an ideal solution for cleaning livestock buildings/barns and transport trailers.

Key Features

- Safely removes fats, oils, grease, feces and urine from concrete, tile, wood, vinyl and rubber floors without leaving a chemical residue
- Excellent surface preparation cleaner for areas that are going to be sealed, coated, or disinfected
- FOGFU does not need to be neutralized and does not leave a chemical residue
- Degrades/eliminates organics that are found in drain lines and grease traps while also eliminating odors
- Penetrates into all cracks, crevices and pores of the various surfaces where organics accumulate eating contaminants leaving them visually cleaner
- FOGFU provides odor control by eliminating the organics that cause odors and preventing the return of odor causing compounds
- Eliminates the need for excessive pumping in septic tanks and water treatment facilities. The microbes will consume toilet tissue, hair, starches, and proteins that cause the tank and drain fields to become clogged

Application Instructions:

1. Sweep entire floor
2. Shake pail before pouring into a portable spray unit or spray equipment
3. Pre-wet the floor with regular tap water using a separate sprayer or hose
4. Spray equal parts of FOGFU over the pre-wet floor
5. Immediately agitate the solution to a foamy consistency and let dwell 20-30 minutes
6. A second agitation may be needed during dwell time for floors that have buildup of FOGFU
7. Rinse solution after dwell time. It is safe to rinse down drains and if there are no drains, rinse and extract. Contact us to request daily cleaning and mop bucket instructions.

Application Instruction for cleaning livestock buildings/barns

1. Shovel or pressure wash solids from the entire floor/walls if need be, to be cleaned
2. Shake pail before pouring into portable spray unit or spray equipment. Do not mix with any other cleaners

3. Pre-wet the floor with tap water using sprayer or water hose
4. Spray equal parts of FOGFU over the pre-wet area
5. Immediately agitate the solution to a foamy consistency and let dwell for 20-30 minutes. Note: If solution begins to dry out during the dwell time, lightly mist with water over the entire area
6. A second agitation may be needed during dwell time for floors that are severely contaminated or have feces built up in cracks and crevices. This will allow the microbes to clean deep into the pores of the floor
7. Rinse with tap water at the end of dwell time. Cleaning completed and let dry before disinfecting with Sani-Powder.

Storage

- FOGFU has a 2 year shelf life
- Close container tightly after each use
- Store in original container only
- Store in and use in temperatures between 40 and 120 degrees

Availability

- Item Code: Mr. Eats-It Fats Oils Grease Feces & Urine
- Size: 5 gallons or 53 gallon drums
- Package: 5 gallon pail or 53 gallon drum

Coverage

300-400 square feet per gallon
